1512. Number of Good Pairs(「好配」的數目)

傳入一個整數陣列 nums, 回每此陣列中「好配」的數目.

一個配對 (i, j) 被稱為「好配」時, 代表 nums[i] == nums[j] 而且 i < j.

Example 1:

```
Input: nums = [1,2,3,1,1,3]
```

Output: 4

Explanation: There are 4 good pairs (0,3), (0,4), (3,4), (2,5) 0-indexed.

Example 2:

```
Input: nums = [1,1,1,1]
```

Output: 6

Explanation: Each pair in the array are good.

Example 3:

```
Input: nums = [1,2,3]
```

Output: 0

Constraints:

- 1 <= nums.length <= 100
- 1 <= nums[i] <= 100
